

ROBIN BIJU THOMAS

LEARN | MAKE | SHARE

www.ThomasRob.in

An aspiring engineer with a strong will to make his mark in the tech industry. I have been tinkering with electronics since the age of twelve and have been working on projects ever since. I love adding my personal touch to make things work for me. Nothing fascinates me more than blurring the barrier between man and technology and being able to contribute to the wave of advancements in technology. I am quick to learn and eager to share. Please stop by my website to know more about me.
